

TECHNICAL BULLETIN

Description/Features

SCL-GP20 Granite Polishing Powder is a unique blend of polishing powder designed to bring back luster of a badly worn granite floor.

Additional Properties

- Does not contain any wax compound.
- It does not have wax build-up residue when regularly used

Uses

Bring back luster of a worn down granite floor

Approximate Coverage

1-kg covers 40m² to 50m²

Color available:

Black & White

Things to Note

Recommended weight of the floor polishing machine is between 55 to 65kg.

Precautions

- Cover all surfaces that are not stone.
- Always test a small area first to familiarize with the product before working on a bigger area.

Polishing Procedures:

1. Place one table spoon of SCL-GP20 Granite Polishing Powder onto the floor
2. Place the floor polishing machine on top of the powder before begin working with the machine.
3. A "3M" RED polishing pad is recommended.
4. Add only enough water so that the circular pattern left by the slurry is visible.
5. Polished the slurry until dry or semi-dry.
6. Use Diamond Polishing Pad grit #400 & #800 (diamond pad is optional) prior to using GP20 Granite Polishing Powder
7. Rinse the entire floor with SCL-Stoneclean or SCL-Neutral Clean.
