

TECHNICAL BULLETIN

Description/Features

SCL-HP200 Honing Powder is a unique blend of abrasive powder that will remove heavy soils from the surface for effortless cleaning. Ideal to use in conjunction with SCL-Stoneclean Xtra.

Additional Properties

- Does not contain any wax compound.
- When regularly used, it does not have build-up residue.

Uses

Recommended for periodic cleaning on flamed or honed finished granite and matte finished homogeneous tiles.

Approximate Coverage

1-kg covers 40m² to 60m²

Things to Note

Recommended weight of the floor polishing machine is between 50kg to 65kg.

Important Note:

Do not use SCL-HP200 Honing Powder on polished surface marble, polished granite and polished homogeneous tile.

SCL-Stoneclean Xtra

Polishing Application

1. Place one table spoon of SCL-HP200 Honing Powder onto the floor. Place the polishing machine on top of the powder before begin working with the machine.
3. A "3M" RED / BLACK polishing pad is recommended.
4. Dilute SCL-Stoneclean Xtra with water and put into the solution tank. Release SCL-Stoneclean Xtra when polishing begin.
5. Add only enough solution so that the circular pattern left by the slurry is visible.
6. Polished until the surface is cleaned.
7. Changed a new polishing pad.
8. Release only Stoneclean Xtra to rinse the entire floor.
9. Pick up the residue with a wet/dry vacuum.
