

TECHNICAL BULLETIN

Description/Features

SCL-Marble Polishing Powder is a unique blend of polishing powder designed to bring back luster of a dull marble surface.

Additional Properties

- Does not contain any wax compound.
- It does not have wax build-up residue when regularly used

Uses

- Recommended for weekly or periodic maintenance to maintain the marble surface shine.
- Ideal to remove dull spot and etched mark.

Approximate Coverage

1-kg covers 40m² to 50m²

Color available: Light Yellow

Recommended weight of floor polishing

Machine to use: between 48kg to 60kg.

Precautions

- Cover all surfaces that are not stone.
- Always test a small area first to familiarize with the product before working on a bigger area.

Polishing Application

1. Place one table spoon of SCL-Marble Polishing Powder onto the floor
2. Place the polishing machine on top of the powder before begin working with the machine.
3. A "3M" RED polishing pad is recommended.
4. Add only enough water so that the circular pattern left by the slurry is visible.
5. Polished the slurry about 8 to 12 passes to obtain shine. Number of passes shall depend on the floor condition.
6. After polishing the entire marble floor, rinse the floor with SCL-Stoneclean or SCL-Neutral Clean.
7. Badly worn marble floor condition require to polish with Diamond polishing pad prior to use SCL Marble Polishing Powder.

First Aids

- If contacted with eyes, wash the affected area with plenty of water and call for a physician.
- Wash hands thoroughly before mealtime.
- Keep out of reach from children
